1 Dark Elf

1 Dark Elf

1.1 Hidden

cost 4xp

Required To by Unit Base: Infantry

Operational by 1 choosen infantry base

Hidden: while hidden you cannot be fired upon or be assaulted, nor can you fire or assault. Gain hidden version of all movement orders: hidden stand-still, hidden slow and hidden crawl, but do not gain any fire orders available while hidden. However, if in an assault you may choose to reveal your self, gaining the reveal bonuses. Replace the infantry base with a hidden token, and you do not have to tell the enemy exactly what is under the hidden token. You may start hidden if you wish.

You stay hidden until you reveal your self, have a speed of hidden-slow in a clear hex with line of sight of enemy, or in aftermath phase if an enemy is within point blank range, or by enemy special action. You only get reveal bonuses while using the reveal order or in assaults.

Reveal bonuses: +2 to hit, +1 to damage of ranged weapons, +50% assault and assault deflection dice (rounded up). This round only

Hide action: remove your unit from the board, replace it with a hidden token. Only works if you are in swamp terrain.

Reveal: place your infantry within 2 hexes of the hidden token and gain reveal bonuses.

Infiltrate: may start up to 2 hex from normal starting area

While Hidden or during phases with reveal bonuses the unit base gains Ignore[Fear] and Ignore[Terror]

Unit base gains (hidden or not): Camouflage[swamp][-1]

When fired at, you may pretend to look at normal infantry damage table unless the damage is 4 or above, for which the illusion is given away and is removed from play.

Further, if the illusion is matched with one real infantry base, it may mimic the orders of that infantry, and may follow it where ever the infantry goes.

The illusion have the exact same modifiers and abilities with regard to being hit as the infantry it is mimicing. Thus, the illusion has Take Cover[stand-still][-2], Take Cover[stand-still][-3], and camouflouage[forrest][-1] as appropriate

Thus the enemy do not know which are illusions and which are real. However if, for any reason, the enemy gets information which gives the illusion away, the illusion is not removed from play, but must be identified by an illusion marker. For example if the illusion was fired at by something which does psychic damage, it would require you to tell the enemy that this unit does not have a psychic damage table, which would give the illusion away.

If the illusion is not in a hex with a friendly infantry, it has only chase order available

Not Yet dead: after this model in the unit base is killed, this model is not yet dead after all. This model becomes a new unit base and becomes an *awakened war hero* with the same equipment as this model and orders available as the unit base this model is attached to . Awakened War Hero does not retain any of the abilities from the unit base or the model, and has a seperate model and unit base entry. See War Hero. In the case this model is not the last model to be eliminated, it may be the case that you get an extra unit base in the hex. If this causes overcrowding (more than 2 bases in a hex), the war hero may spawn in one of the neighboring hex which is furthest from an enemy unit

This only replaces models of existing units. For damage and orders available see the unit which you replace models from.
